Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status							
1) Responsive to communication(s) filed on 26 A	<u>ugust 2002</u> .						
2a) This action is FINAL . 2b) Thi	s action is non-final.						
3) Since this application is in condition for allowa	nce except for formal matters, pro	osecution as to the merits is					
closed in accordance with the practice under E Disposition of Claims	=x parte Quayle, 1935 C.D. 11, 4	53 O.G. 213.					
4)⊠ Claim(s) <u>1-20</u> is/are pending in the application.							
4a) Of the above claim(s) <u>1-16</u> is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.							
6)⊠ Claim(s) <u>17-20</u> is/are rejected.							
7) Claim(s) is/are objected to.							
8) Claim(s) are subject to restriction and/or election requirement.							
Application Papers							
9) The specification is objected to by the Examiner.							
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).							
11) The proposed drawing correction filed on is: a) approved b) disapproved by the Examiner. If approved, corrected drawings are required in reply to this Office action.							
12) The oath or declaration is objected to by the Examiner.							
Priority under 35 U.S.C. §§ 119 and 120							
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 17 is rejected under 35 U.S.C. 102(e) as being anticipated by Fisher .

Fisher teaches a method of fabricating a semiconductor wafer, comprising:

subjecting the wafer to a pressure;

and measuring said pressure said wafer is subjected to with a pressure measurement device supported on said wafer.

See Fig. 2A as well as the abstract.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/960,441

Art Unit: 2812

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over fisher in view of Myers et al. While Fisher does not specifically teach a capacitive sensor, such sensors are well known in the art and are taught, for example, by Myers et al. (see Figs. 1 and 2). It would have been obvious to one of ordinary skill in the art at the time of the invention to use a capacitive sensor as is taught by Myers et al., since this is a well known type of pressure sensor.

Claims 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fisher in view of Myers et al. Smesny et al. Smesny et al. teach a similar process to that of Fisher, which includes storing pressure data in data storage circuitry and transmitting the signal to a receiver with transmitter circuitry which is electrically coupled to said capacitance conversion circuitry. It would have been obvious to one of ordinary skill in the art at the time of the invention to take the pressure data, store it, and transmit it to a relevant control center, since this would allow calibration of the processing conditions of a process like that of Fisher.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Moore also teaches a sensor on a substrate which measures the pressure applied to a substrate during processing. Lin, Sugiyama et al., Biebl et al. are examples of a capacitive type pressure sensor.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viktor Simkovic whose telephone number is 703-308-
